DUBAI
GLOBAL APPLIED KNOWLEDGE

Week - 2

28/09/2026

① what we are going to learn.

Conditional operators

$<$, $>$, $\leq$, $\geq$ ....

== ⟹ equal to (for can relation)

! ⟹ not equal to (≠)

7 ⟹ greater than

$<$ ⟹ less than

>= ⟹ at least

<= ⟹ at most

: ⟹ Then

② if

if - else

if - elif

③ loops → while
→ for
→ do while

Example:

```
a = 7
b = 20
print(a > b)
```

↓

Boolean

True ← → False

Output

False

Note: a = b → assignment statement

a == b → conditional statement

11 condition

A	B	A or B
T	T	T
T	F	T
F	T	T
F	F	F

A	B	A and B
T	T	T
T	F	F
F	T	F
F	F	F

Example :

a = 17

b = 14

c = a > b

⇒ print (f"a is {a} ")

print (f"b is {b} ")

print (f"c is {a > b} ")

or

print (f"a is {a} \n b is {b} \n

c is {c} ")

output ⇒ a is 17

b is 14

c is True.

GLOBAL APPLIED KNOWLEDGE

Condition opperator which use : if 01/10/2026

Condition : 1

$m_1 = 20$

$m_2 = 97$

$20 > 97$ False

```
if (m1 > m2):
    gr = m1
    print (gr)
print ("finish")
```

code blocked is skipped

code block

Output : Finish

Condition : 2

$m_1 = 100$

$m_2 = 97$

$100 > 97$ True

```
if (m1 > m2):
    gr = m1
    print (gr)
print ("finish")
```

It will execute code block

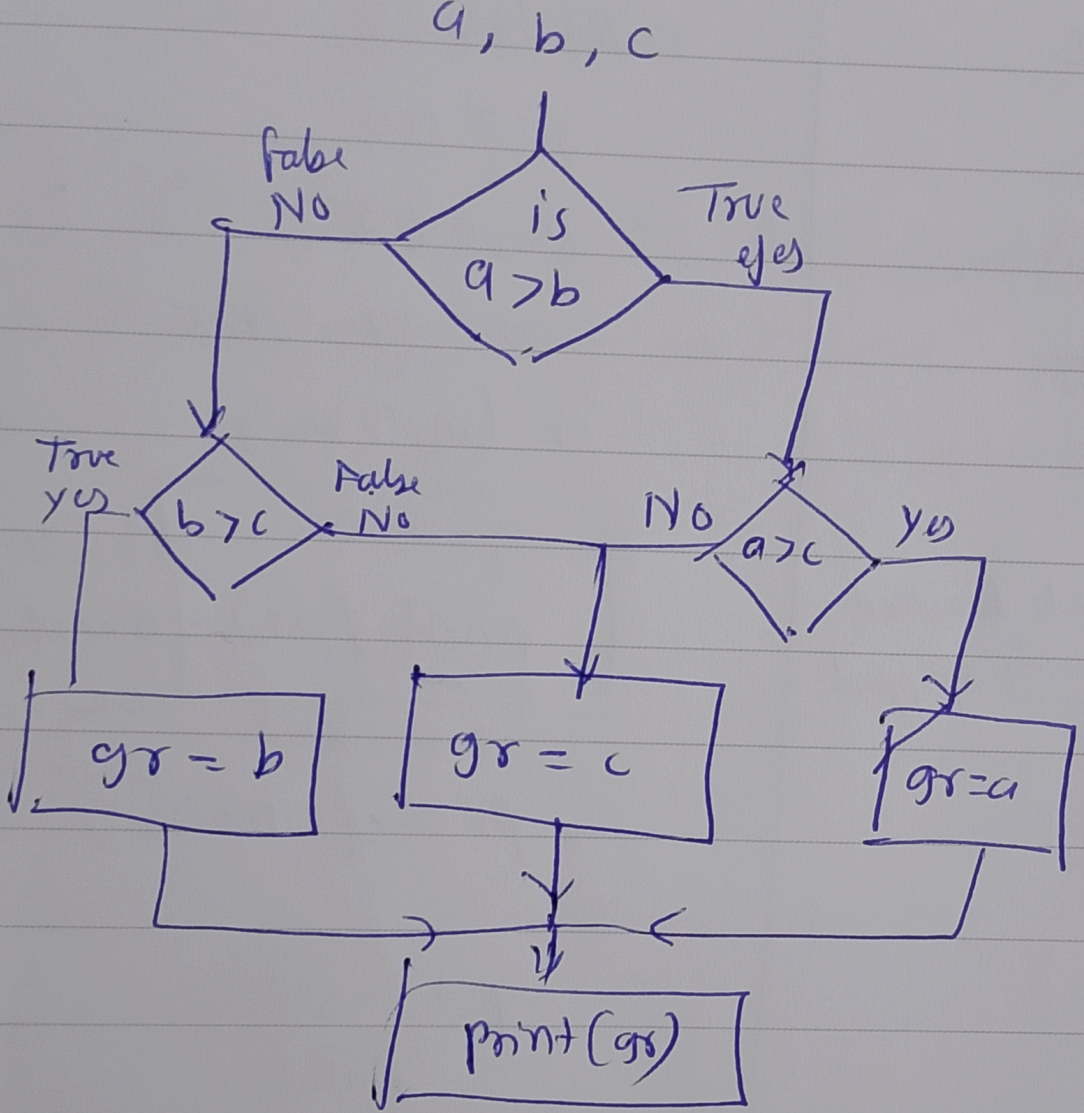

code block

Output :- 100
finish

Example :-

```
m1 = 49
m2 = 94
if (m1 > m2):
else:
    gr = m2
    print ("gr =", gr)
    print ("finish")
```

output :
gr : 94
finish

In which language

Python

```
a =
b =
c =
if (a > b):
    if (a > c):
        gr = a
    else:
        gr = c
else: if (b > c)
    gr = b
else:
    gr = c
print(gr)
```

eg:- For loop:

```
for i in range (5):
    print (i)
```

output : 0
1
2
3
4

```
for i in range (1,5):
    print (i)
```

output : 1
2
3
4

for even no

```
for i in range (2,11,2):
```

output : 2
4
6
8
10

for even no

```
for i in range (1,11,2)
```

output : 1
3
5
7
9

Enumerate () -

eg:- output:

0 c

1 a

2 t

↓ ↓

Index value

Both at the same time
